

Students Sleep, Eat, and Study on Floors, No Beds or Dining Area Provided

“There is no designated residential area for either boys or girls. The same rooms are being used for sleeping, classes and dining,. No beds are provided—students sleep on the floor using a single synthetic blanket,” the report noted.

Further, the girls’ residential area, accommodating 136 students, had only two toilets. The lack of sanitation facilities forces some girls to resort to open defecation across the road, a situation the SHRC called “inhuman” and a violation of the students’ right to dignity.
